County: Sheboygan

Waypoints: 37-39

Access/Directions Parking lot of ice skating arena on the north side of the river, east of Taylor Drive

Site description: A thicketty "woods" on steep slopes, narrow floodplain, &amp; top of slope along the north side of the Sheboygan River. Mostly invasive exotic &amp; adventives. Dominated by box elder, common buckthorn, garlic mustard, daines rocket, with waterleaf. The area on the top off of the slopes is in the worst shape, the slopes and river banks are in a little better shape with native herbs having more coverage &amp; diversity.

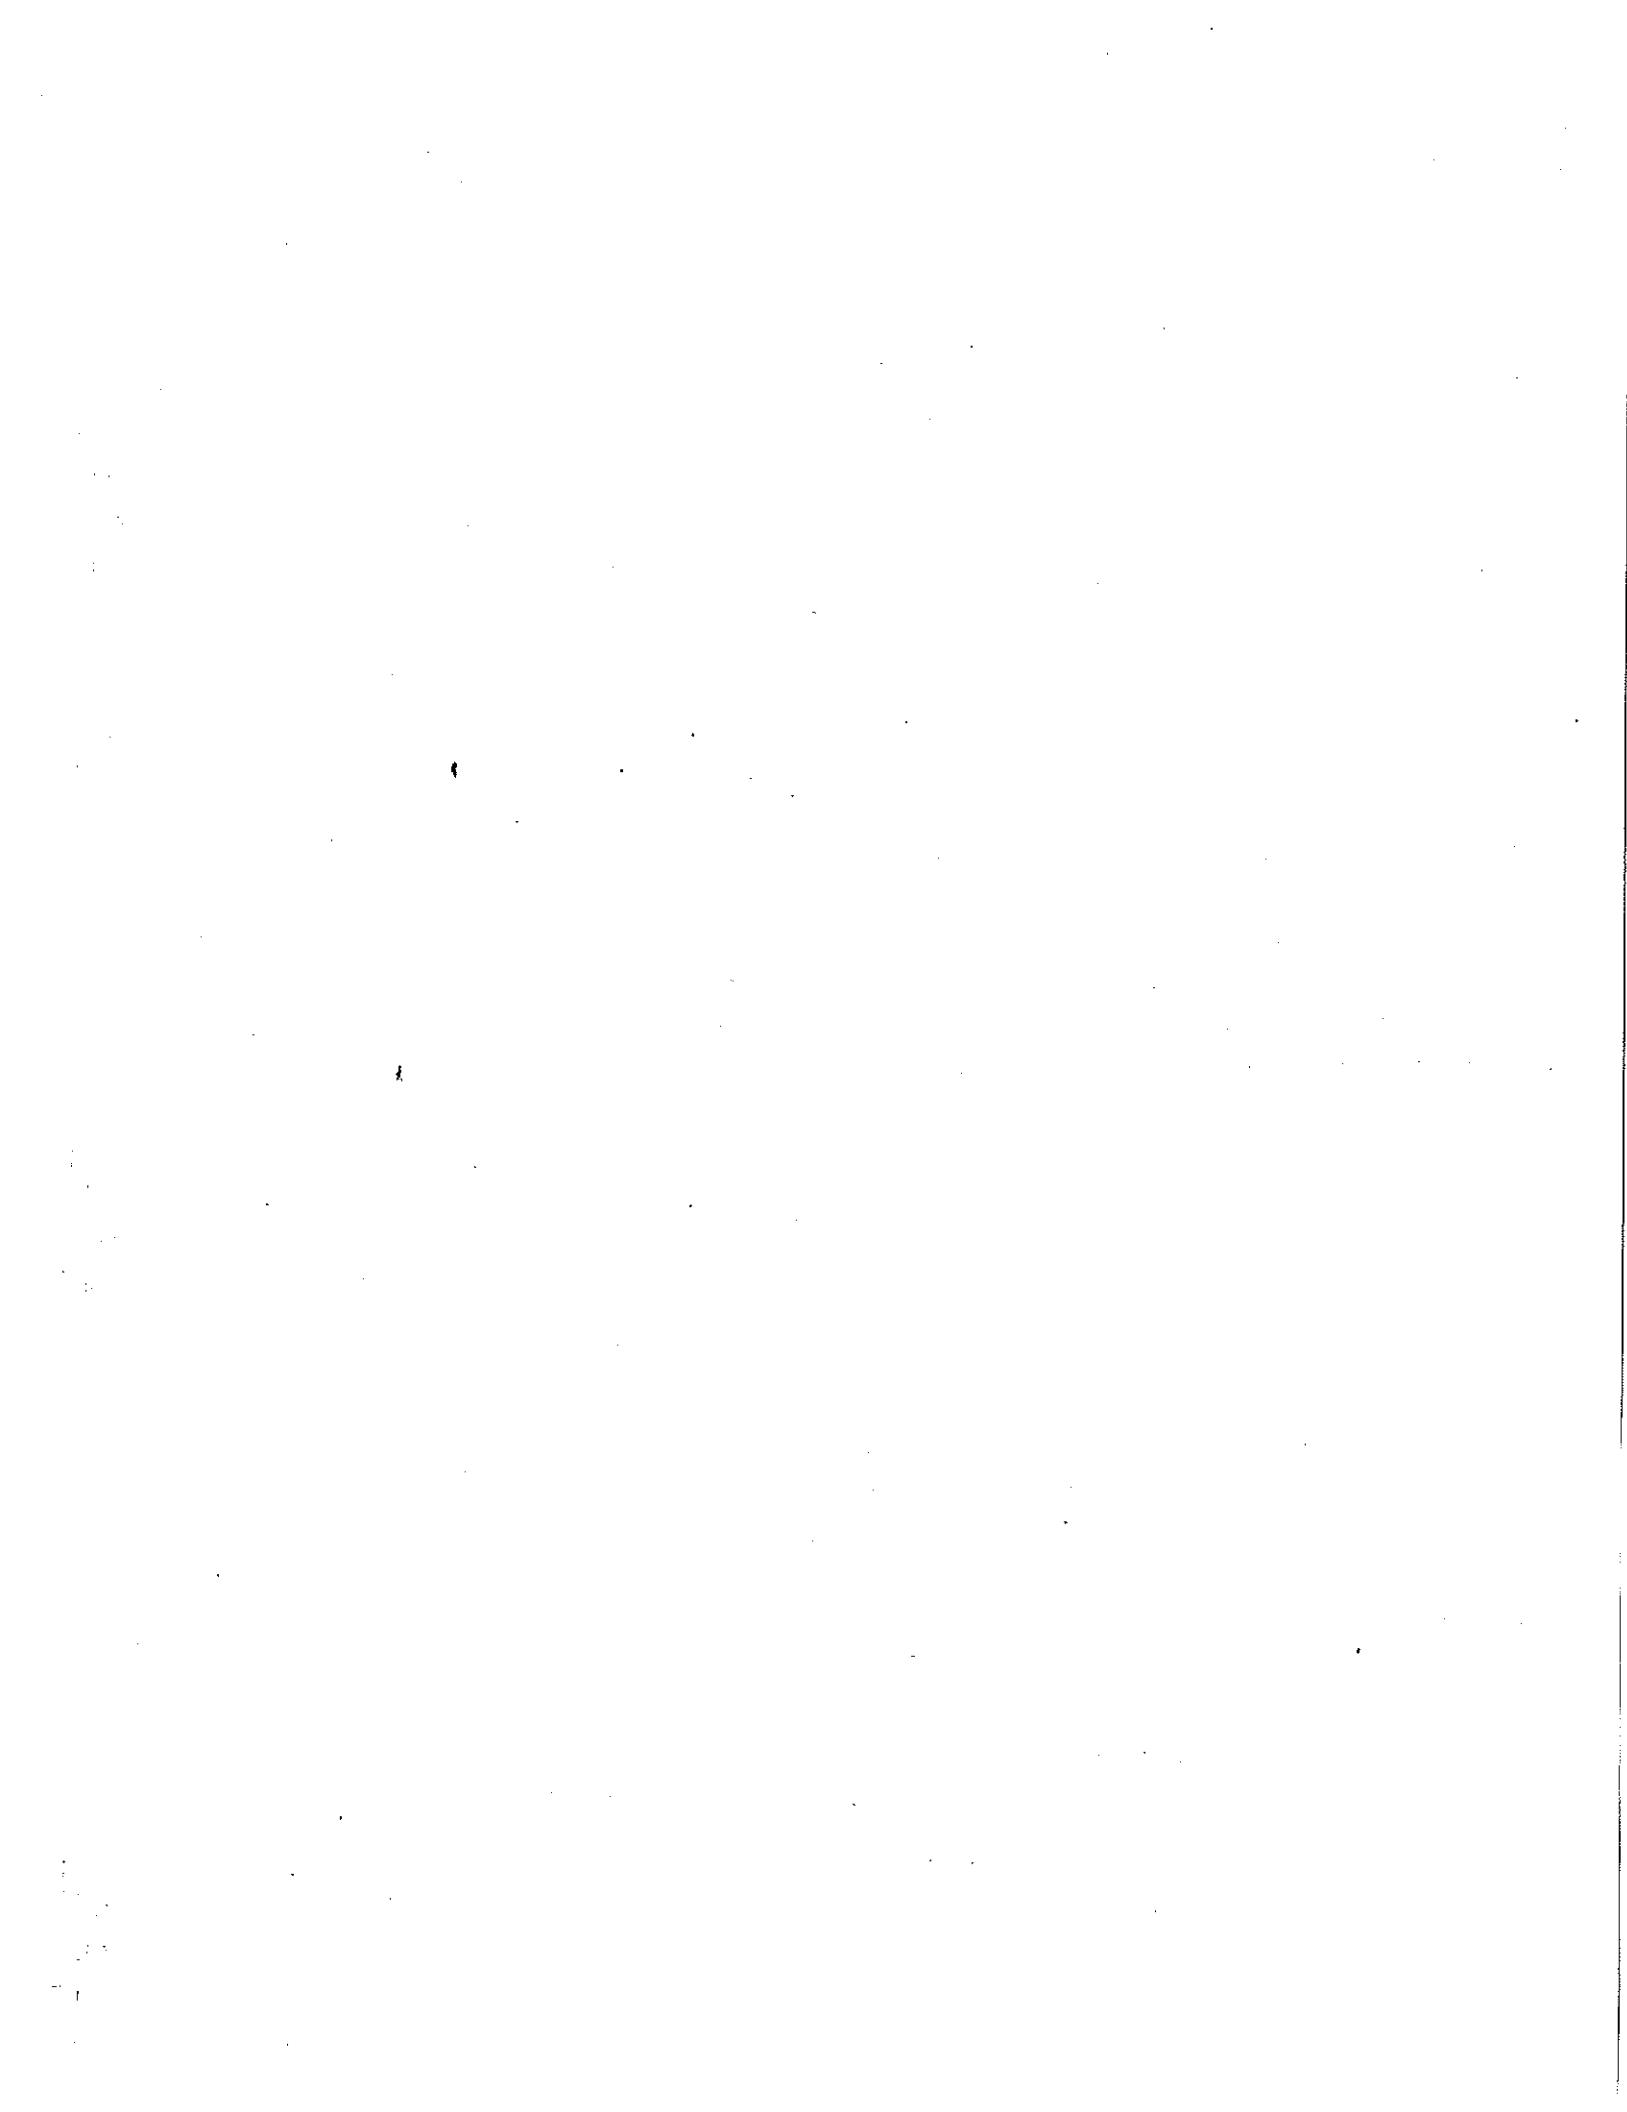

Site Significance: Highly disturbed, exotic &amp; adventive dominated "woods" with native herbs &amp; a few native woody plants.

Management considerations: Restoration to native or natural conditions would take a huge effort. Potentially native trees may move in in time

Land-use of site & surrounding landscape ~~mostly~~ On the western edges of the city of Sheboygan, surrounded by development

Community type(s): None

Rare species, SGCN species, or unusual features present: None
